

BIRTHDAY BUNDLE

BUNDLE – PEOPLE SURVEY + RISK TOOL

Survey. Score. Build your Risk Register.

The complete psychosocial risk solution for small and medium business. Survey your team, then build a compliant WHS risk register - at your own pace, guided every step of the way.

Under the WHS Act, identifying hazards is only step one. You then need to assess the risk, document your controls, and build a register. The Humn IQ™ Bundle takes you all the way through.

WHAT'S INCLUDED IN THE HUMN IQ™ BUNDLE

- Everything in Humn People Survey - CEO dashboard, PDF report, compliance flags
- Access to the Humn IQ™ SME Psychosocial Tool - your guided risk register
- Enter hazard scores, document existing controls, build your register step by step
- Prioritised action plan showing which hazards to address first
- Step-by-step instruction manual - written in plain English, no consultant required
- WHS consultation records to meet your obligations under sections 46 to 48
- Everything you need to be inspection-ready - done at your own pace

The instruction manual walks you through every step: how to read your results, score each hazard, document controls, and demonstrate consultation. If a SafeWork inspector came tomorrow, you would have something to show them.
